Cadsoft Corporation Releases Envisioneer Version 7

Guelph, ON, June 24, 2011 – Cadsoft Corporation, the leading developer of Building Information Modeling (BIM) software for the residential and light commercial construction industry, is proud to announce the release of Envisioneer 7.

Envisioneer 7 brings some of the most powerful advancements in Building Information Modeling including strategic design enhancements, precision documentation, and productivity gains in on screen quantity takeoff for Cadsoft's ever growing builder and material supply dealer client base.

This exciting release continues to deliver on Cadsoft's mission to continue to deliver the easiest to use, most complete BIM solution for the residential design, construction, and building materials supply chain. Builders and designers can significantly improve collaboration with their Lumber and Building Material (LBM) dealers early in the design phase, helping to reduce project costs and improve quality by virtually eliminating data duplication.

Envisioneer 7 delivers on significant enhancements in the following key areas:

- **BIM Design** for advancements in Building Information Modeling, ease of 3D design, and modeling flexibility
- **Construction Documentation** for faster generation of working drawings and annotation speed, dimensioning, and accuracy
- **Quantity Takeoff** for flexibility in on screen takeoff capabilities, material list reporting, cut list optimization, and report writing accuracy
- **Collaboration** for expanding integration capabilities and communication with key industry analysis and business systems

Brad Finck, Vice President, Business Development of Cadsoft states: "We are excited to be releasing the next major milestone in the evolution of the Envisioneer BIM technology platform. As Envisioneer continues to be embraced by a wider segment of the market, our focus on improving the productivity of our client base and their communication with the building industry remains our strength moving forward.

Envisioneer is available through the worldwide Cadsoft Business Partner Network.
