

FOR IMMEDIATE RELEASE

CADSOFT Unveils Envisioneer 4.0

Guelph Ontario Canada, Feb, 2007 — CADSOFT Corporation, a leading developer of three-dimensional home improvement software for design-builders, contractors, remodelers, and interior designers, is proud to announce the unveiling of Envisioneer 4.0.

Scheduled for a March 2007 release, Envisioneer 4.0 focuses largely on providing the serious production tools necessary to complete fast, accurate and detailed construction documents. Envisioneer also builds and improves on the easiest to use building information modeling (BIM) system available today in the architectural design industry.

Previewed at the 2007 International Builders Show in Orlando, Florida, version 4.0 really delivers on the promise as the most complete cost-effective software system available for the design and construction industry.

Key new features in Envisioneer 4.0 include:

- Advanced drafting toolset for fast drawing and detailing
- New drawing worksheet module with powerful scaled page layout views
- Many new country specific construction options for Envisioneer's ever growing international user base
- Powerful parametric model details to automate time consuming tasks such as the application of quoining and corner trim
- Enhanced framing features including roof members and portal frame placement
- Advanced precision wall insertion and openings to increase drawing speed
- Room region area and schedule command for detailed reporting
- Industry integration improvements including new support of Google Sketchup .SKP file format complete with textures
- Additional remodeling tools including additional kitchen and bath design detail options

Brad Finck, VP Business Development, states: "We are extremely excited about the unveiling of Envisioneer 4.0 and the additional power introduced into this version. We continue to strive to be a software company that listens and responds to our user base, offering the tools that are most commonly requested and that will give our clients every day business functionality and productivity.

Envisioneer 4.0 is available through Cadsoft's ever growing worldwide business partner network.

About Cadsoft Corporation
