

System Requirements

In order to run the program, your system should meet the following requirements:

- Microsoft® Windows® 2000 (SP4), Windows® XP (SP2), or Windows® Vista
- 500Mhz or higher processor**
- 1 GB RAM (2 GB recommended)*
- 750MB minimum free hard drive space*
- 4X CD-ROM drive or faster
- Video Card with OpenGL driver and a minimum of 64 MB RAM (128 MB or greater dedicated graphics card recommended)*
- Color monitor with 1024x768 resolution or higher
- An Internet browser such as Internet Explorer® to view the online help and access online features***

Note: If you are installing Envisioneer on Windows XP, your user account should be set to Computer Administrator (not Limited) to install the program.

*Additional system and video memory will improve speed and 3D Real View™ rendering capabilities.

**System Configuration: May require minor adjustments to the configuration of your operating system and /or updates to the hardware component drivers.
